PROJECTS

Gmail Unsubscriber <https://unsubby-ts.netlify.app/>

Unsubby is a React/Typescript project designed to enhance the management of email subscriptions by seamlessly integrating with the Gmail API. The project features a user-friendly interface that allows users to group email subscriptions efficiently, simplifying the process of removing unwanted subscriptions.

Finance Tracker <https://shiftworkbuddy-mj.netlify.app/>

Shiftwork Buddy is a finance tracker I built for my colleagues using Firebase and React. The app efficiently records start and finish times, automating calculations for worked hours, tax, and projected income.

Real-time chat app <https://maxcord-mj.netlify.app/>

Inspired by the functionality of Discord, I crafted a real-time chat app using React. Leveraging Context API for seamless global state management, React state for dynamic channel and message handling, and Firebase for database and user authentication, the project delivers a responsive and interactive communication platform.

Interior Design Website <https://farrugiadesign.netlify.app/>

Farrugia Design, an interior website I developed for a client, showcases the power of React's reusable components and a custom UI library. Through a meticulous approach, I delivered a lightweight and clean project that significantly enhanced site speed, surpassing the performance of the client's previous platform.

Spotify Dashboard <https://spotify-clone-mj.netlify.app/>

Utilising the public Spotify API, I reconstructed the Spotify dashboard, enabling users to seamlessly explore playlists, review recently played songs, and conduct searches within the extensive Spotify database.

EMPLOYMENT

The Intermedia Group September 2023 - Current

Junior Frontend Developer

- Developed comprehensive documentation, improving onboarding for new developers.
- Optimized workflows and promoted knowledge-sharing for enhanced development efficiency.
- Provided technical support for client websites, resolving complex issues efficiently.
- Collaborated across 50 unique PHP & Javascript websites, showcasing adaptability in diverse project environments.

Fox Sports Australia June 2018 - September 2023

Presentation Coordinator

- Setup and troubleshoot LIVE sport from incoming satellite feeds
- Displayed strong written and verbal communication on a daily basis
- Worked to strict time-sensitive Television deadlines

EDUCATION

Harvard CS50, Introduction to Computer Science • Currently undertaking

TOOLS & TECHNOLOGIES

- HTML • CSS • Javascript • React • Typescript
- Git • PHP • Tailwind • Sass • SQL • NoSQL
