PROJECTS

Unsubby   https://unsubby-ts.netlify.app/

React   Typescript   Supabase   Tailwind   Gmail API

Unsubby is an email management solution, seamlessly integrated with the Gmail API. The project features a user-friendly interface that allows users to group email subscriptions efficiently, simplifying the process of unsubscribing.

ShiftworkBuddy   https://shiftworkbuddy-mj.netlify.app/

React   Javascript   Tailwind   Firebase

Shiftwork buddy is an income tracker I built for my colleagues. As a freelance worker, it allows you to log start and finish times along with an hourly rate. It will then store these in a database and calculate your expected income and tax payable.

Spotify Dashboard   https://spotify-clone-mj.netlify.app/

React   Javascript   Tailwind   Spotify API

Utilising the public Spotify API, I reconstructed the Spotify dashboard, enabling users to seamlessly explore playlists, review recently played songs, and conduct searches within the extensive Spotify database.

EMPLOYMENT

The Intermedia Group   September 2023 - Current

Junior Frontend Developer

- Crafted documentation that provides instructions and resources for setting up their local environments and understanding our organisational workflows.
- Acted as a primary point of contact for clients, addressing their concerns and resolving issues promptly
- Collaborated on a diverse range of PHP and Javascript websites

Fox Sports Australia   June 2018 - September 2023

Presentation Coordinator

- Setup and troubleshoot LIVE sport from incoming satellite feeds
